The information provided is intended to give the user a general estimate of the environmental fate of this product under the defined conditions of the models.

If released into the environment this material is expected to distribute to the air, water and soil/sediment in the approximate respective percentages;

| | |
|-------|------------|
| Air | : <5% |
| Water | : 30 - 50% |
| Soil | : 50 - 70% |

The portion in water is expected to be soluble or dispersible.
