- Inhalation** : Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
- Ingestion** : Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth if unconscious.
- Indication of Immediate Medical Attention and Special Treatment Needed** : In the event of an adverse response, treatment should be directed toward control of the symptoms.

### 5. Fire Fighting Measures

- Extinguishing Media** : Use foam, water spray, dry chemical and carbon dioxide (CO<sub>2</sub>) extinguishing agents.
- Specific Hazards Arising from the Chemical** : Can release vapors that form explosive mixtures at temperatures at or above the flash point. Heavy vapors can flow along surfaces to distant ignition sources and flash back. Water runoff can cause environmental damage.
- Special Fire Fight Proc** : Wear self-contained breathing apparatus and full protective clothing. Evacuate nonessential personnel from the area to prevent exposure to fire, smoke, fumes or products of combustion. Dike and collect runoff.

### 6. Accidental Release Measures

- Personal Precautions** : Isolate hazard area. Keep unnecessary and unprotected personnel from entering. Warning - flammable vapors may be present. Eliminate sources of ignition and ventilate spill area.
- Protective Equipment** : Splashproof goggles or face shield, impervious gloves, impervious apron and footwear. Self-contained breathing apparatus may be needed in case of emergency spills, when exposure levels are unknown, or under any circumstances where air-purifying respirators may not provide adequate protection. Eyewash and emergency shower should be available in work area.
- Emergency Procedures** : Control the spill at its source. Contain the spill to prevent spreading to or contaminating soil or from entering sewage and drainage systems or any body of water. Use non-sparking cleanup equipment to prevent ignition.
- Methods and Materials for Containment and Cleanup** : Cover entire spill with absorbent material, collect and place in compatible disposal container. Scrub area with hard water detergent, e.g., commercial products such as Tide or Joy. Pick up wash liquid with additional absorbent and place into compatible disposal container. Once all material is cleaned up and placed in a disposal container, seal container and arrange for disposition.

### 7. Handling and Storage

- Precautions for Safe Handling** : Wear proper personal protective equipment. Keep away from heat/sparks/open flames/hot surfaces. No smoking. Avoid contact with eyes, skin or clothing. Avoid breathing mist/vapors/spray. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wash clothing after use. Do not store or consume food or drink, or use tobacco, in areas where they may become contaminated with this material. Avoid release to the environment. Ground/bond container and receiving equipment. Use explosion-proof electrical equipment.
- Conditions for Safe Storage** : Keep out of reach of children. Keep product in original container. Keep container tightly closed. Keep away from heat/sparks/open flames/hot surfaces. Store in a cool, dry, secure and well-ventilated place. Protect from excessive heat. Do not contaminate food or foodstuffs. Do not store or transport near food or feed. Avoid release to the environment.
