#### 2.1 Classification of the substance or mixture

| CLP     | <ul> <li>Compressed Gas - H280</li> <li>Reproductive Toxicity 1A - H360D</li> <li>Specific Target Organ Toxicity Repeated Exposure 2 - H373</li> </ul> |
|---------|--|
| DSD/DPD | <ul> <li>Harmful (Xn)</li> <li>Substances Toxic To Reproduction - Category 1</li> <li>R20, R48/20, R61</li> </ul>                                      |

## 2.2 Label Elements

| Hazard statements.              | H280 - Contains gas under pressure; may explode if heated<br>H360D - May damage the unborn child.   |
|---------------------------------|---|
|                                 | H373 - May cause damage to organs through prolonged or repeated exposure.   |
| <b>Precautionary statements</b> |   |
|                                 | <ul> <li>P201 - Obtain special instructions before use.</li> <li>P202 - Do not handle until all safety precautions have been read and understood.</li> <li>P260 - Do not breathe gas.</li> <li>P281 - Use personal protective equipment as required.</li> </ul> |
| Response .                      | P308+P313 - IF exposed or concerned: Get medical advice/attention.<br>P314 - Get medical advice/attention if you feel unwell.   |
| Storage/Disposal .              | <ul> <li>P403 - Store in a well-ventilated place.</li> <li>P405 - Store locked up.</li> <li>P501 - Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.</li> </ul>                               |
| DSD/DPD                         |   |
|                                 |   |
| Risk phrases .                  | <ul> <li>R20 - Harmful by inhalation.</li> <li>R48/20 - Harmful: danger of serious damage to health by prolonged exposure through inhalation.</li> <li>R61 - May cause harm to the unborn child.</li> </ul>   |
| Safety phrases .                | S53 - Avoid exposure - obtain special instructions before use.  |
| 2.3 Other Hazards               |   |
| CLP .                           | This material is a simple asphyxiant. May displace or reduce oxygen available for breathing especially in confined spaces.<br>According to Regulation (EC) No. 1272/2008 (CLP) this material is considered hazardous.   |
| DSD/DPD .                       | This material is a simple asphyxiant. May displace or reduce oxygen available for breathing especially in confined spaces.<br>According to European Directive 1999/45/EC this preparation is considered dangerous.  |

#### **United States (US)** According to OSHA 29 CFR 1910.1200 HCS

#### 2.1 Classification of the substance or mixture

•

**OSHA HCS 2012** 

Compressed Gas - H280 Reproductive Toxicity 1A - H360 Simple Asphyxiant

#### 2.2 Label elements

**OSHA HCS 2012** 

Hazard statements . Contains gas under pressure; may explode if heated - H280 May damage fertility or the unborn child. - H360 May displace oxygen and cause rapid suffocation.

| Precautionary statements |   |
|--------------------------|---|
| Prevention .             | Obtain special instructions before use P201<br>Do not handle until all safety precautions have been read and understood P202<br>Do not breathe gas P260<br>Wear protective gloves/protective clothing/eye protection/face protection P280 |
| Response .               | IF exposed or concerned: Get medical advice/attention P308+P313   |
| Storage/Disposal .       | Store in a well-ventilated place P403<br>Store locked up P405<br>Dispose of content and/or container in accordance with local, regional, national, and/or<br>international regulations P501   |
| 2.3 Other hazards        |   |
| OSHA HCS 2012 .          | Under United States Regulations (29 CFR 1910.1200 - Hazard Communication Standard), this product is considered hazardous.   |

#### Canada

According to WHMIS

## 2.1 Classification of the substance or mixture

WHMIS

- Compressed Gas A Very Toxic - D1A Other Toxic Effects - D2A
- 2.2 Label elements WHMIS

Compressed Gas - A
 Very Toxic - D1A
 Other Toxic Effects - D2A

# 2.3 Other hazards WHMIS

 This material is a simple asphyxiant. May displace or reduce oxygen available for breathing especially in confined spaces. In Canada, the product mentioned above is considered hazardous under the Workplace Hazardous Materials Information System (WHMIS).

## 2.4 Other information

## Section 3 - Composition/Information on Ingredients

## 3.1 Substances

• Material does not meet the criteria of a substance in accordance with Regulation (EC) No 1272/2008.

## 3.2 Mixtures

|                    | Composition   |                   |   |   |  |

See Section 11 for Toxicological Information. See Section 16 for full text of H-statements and R-phrases.

#### Section 4 - First Aid Measures

#### 4.1 Description of first aid measures

| Inhalation                | • IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Administer oxygen if breathing is difficult. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.   |
|---------------------------|--|
| Skin                      | <ul> <li>Although exposure is unlikely, in case of contact immediately flush skin with running<br/>water. If skin irritation develops get medical advice/attention.</li> </ul>   |
| Еуе                       | • First aid is not expected to be necessary if material is used under ordinary conditions and as recommended. If irritation develops and persists, get medical attention.  |
| Ingestion                 | <ul> <li>Ingestion is not considered a potential route of exposure.</li> </ul>   |
| 4.2 Most important symp   | toms and effects, both acute and delayed   |
|                           | Refer to Section 11 - Toxicological Information.   |
| 4.3 Indication of any imm | nediate medical attention and special treatment needed   |
| Notes to Physician        | • All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred. A potential health hazard associated with this gas is anoxia.                         |
| 4.4 Other information     |  |
|                           | <ul> <li>Ensure that medical personnel are aware of the material(s) involved and take<br/>precautions to protect themselves. RESCUERS SHOULD NOT ATTEMPT TO<br/>RETRIEVE VICTIMS OF EXPOSURE TO GASES WITHOUT ADEQUATE<br/>PERSONAL PROTECTIVE EQUIPMENT. At a minimum, Self -Contained Breathing</li> </ul> |

Apparatus must be worn. Victim(s) who experience any adverse effect after over - exposure to this gas mixture must be taken for medical attention. Rescuers should be taken for medical attention if necessary. Take a copy of the label and the MSDS to physician or other health professional with victim(s).

#### **Section 5 - Firefighting Measures**

#### 5.1 Extinguishing media

Suitable Extinguishing Media . Use extinguishing agent suitable for type of surrounding fire.

| Unsuitable | Extinguishing | • | None known. |
|------------|---------------|---|-------------|
| Media      |               |   |             |

#### 5.2 Special hazards arising from the substance or mixture

Unusual Fire and Explosion<br/>HazardsContainers may explode when heated.<br/>Ruptured cylinders may rocket.Hazardous Combustion<br/>ProductsNo data available

#### 5.3 Advice for firefighters

| <ul> <li>Structural firefighters' protective clothing provides limited protection in fire situations<br/>ONLY; it is not effective in spill situations where direct contact with the substance is<br/>possible.</li> <li>Wear positive pressure self-contained breathing apparatus (SCBA).</li> <li>Move containers from fire area if you can do it without risk.</li> <li>FIRE: If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2<br/>mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all<br/>directions.</li> <li>FIRE INVOLVING TANKS: Fight fire from maximum distance or use unmanned hose<br/>holders or monitor nozzles.</li> <li>FIRE INVOLVING TANKS: Cool containers with flooding quantities of water until well<br/>after fire is out.</li> <li>FIRE INVOLVING TANKS: Do not direct water at source of leak or safety devices;<br/>icing may occur.</li> <li>FIRE INVOLVING TANKS: Withdraw immediately in case of rising sound from venting<br/>safety devices or discoloration of tank.</li> <li>FIRE INVOLVING TANKS: ALWAYS stay away from tanks engulfed in fire.</li> </ul> | e<br>e |
|--|--------|
|--|--------|

#### **Section 6 - Accidental Release Measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

| <b>Personal Precautions</b> | <ul> <li>Do not touch damaged containers or spilled material unless wearing appropriate<br/>protective clothing. Do not touch or walk through spilled material. Ventilate the area<br/>before entry.</li> </ul>   |
|-----------------------------|---|
| Emergency Procedures        | <ul> <li>Stop leak if you can do it without risk. Keep unauthorized personnel away. Keep out of<br/>low areas. Stay upwind. Do not direct water at spill or source of leak. LARGE SPILL:<br/>Consider initial downwind evacuation for at least 500 meters (1/3 mile)</li> </ul> |
| 6.2 Environmental precau    | utions  |
|                             | • Prevent spreading of vapors through sewers, ventilation systems and confined areas.   |

#### 6.3 Methods and material for containment and cleaning up

|                                  | ······································   |
|----------------------------------|--|
| Containment/Clean-up<br>Measures | <ul> <li>Stop leak if you can do it without risk.<br/>Do not direct water at spill or source of leak.<br/>Use water spray to reduce vapors; do not put water directly on leak, spill area or<br/>inside container.<br/>If possible, turn leaking containers so that gas escapes rather than liquid.<br/>Isolate area until gas has dispersed.<br/>Ventilate the area.</li> </ul> |
|                                  |  |

#### 6.4 Reference to other sections

• Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

### Section 7 - Handling and Storage

#### 7.1 Precautions for safe handling

|                             | •   |
|-----------------------------|---|
| Handling .                  | Use only with adequate ventilation. Ventilate closed spaces before entering. Be aware of any signs of dizziness or fatigue, especially if work is done in a poorly ventilated area; exposures to fatal concentrations of this gas mixture could occur without any significant warning symptoms, due to olfactory fatigue or oxygen deficiency. Cylinders should be firmly secured to prevent falling or being knocked -over. Do not attempt to repair, adjust, or in any other way modify cylinders. If there is a malfunction or another type of operational problem, contact nearest distributor immediately. Empty containers retain product residue and can be hazardous. Do not cut, weld, puncture or incinerate container. |
| 7.2 Conditions for safe sto | rage, including any incompatibilities   |
| Storage .                   | Store in a cool, dry, well-ventilated place. Protect cylinders against physical damage. Cylinders should be firmly secured to prevent falling or being knocked -over.   |
| 7.3 Specific end use(s)     |   |
|                             |   |

. Refer to Section 1.2 - Relevant identified uses.

## **Section 8 - Exposure Controls/Personal Protection**

#### 8.1 Control parameters

|                               | Exposure Limits/Guidelines |   |                  |   |   |  |  |

#### 9.2 Other Information

• No additional physical and chemical parameters noted.

#### Section 10: Stability and Reactivity

#### 10.1 Reactivity

• No dangerous reaction known under conditions of normal use.

- **10.2 Chemical stability**
- Stable under normal temperatures and pressures.

#### 10.3 Possibility of hazardous reactions

. Hazardous polymerization will not occur.

#### 10.4 Conditions to avoid

Excess heat.

#### **10.5 Incompatible materials**

 Hydrogen is incompatible with strong oxidizers (i.e. chlorine, bromine, pentafluoride, oxygen, oxygen difluoride, and nitrogen trifluoride). Nitrogen reacts with Li, Nd, and Ti at high temperatures.

#### **10.6 Hazardous decomposition products**

None

#### Section 11 - Toxicological Information

## **Potential Health Effects**

#### Inhalation, Skin, Eye

## Inhalation

Acute (Immediate) Inhalation over-exposures to atmospheres containing more than the Threshold Limit Value of Carbon Monoxide (25 ppm), another component of this gas mixture, can result in serious health consequences. Carbon Monoxide is classified as a chemical asphyxiant, producing a toxic action by combining with the hemoglobin of the blood and replacing the available oxygen. Through this replacement, the body is deprived of the required oxygen, and asphyxiation occurs. Since the affinity of Carbon Monoxide for hemoglobin is about 200-300 times that of oxygen, only a small amount of Carbon Monoxide will cause a toxic reaction to occur. Carbon Monoxide exposures in excess of 50 ppm will produce symptoms of poisoning if breathed for a sufficiently long time. If this gas mixture is released in a small, poorly ventilated area (i.e. an enclosed or confined space), symptoms which may develop include the following: bright red lips and fingernails, headache progessing to heart palpitations, staggering, confusion, nausea, dizziness and unconsciousness with higher concentration exposures. For exposures greater than 2500 ppm there is potential for collapse and death before warning symptoms are experienced. Chronic (Delayed)

. Under normal conditions of use, no health effects are expected.

. Under normal conditions of use, no health effects are expected.

. Under normal conditions of use, no health effects are expected.

. No data available

. No data available

No data available

. No data available

#### Skin

Acute (Immediate)

## Chronic (Delayed)

Eye

Acute (Immediate)

#### Chronic (Delayed)

Ingestion

- Acute (Immediate)
- Chronic (Delayed)

**Reproductive Effects** 

The Carbon Monoxide component of this gas mixture can cause teratogenic effects in humans. Severe exposure to Carbon Monoxide during pregnancy has caused adverse effects and the death of the fetus. In general, maternal symptoms are an indicator of the potential risk to the fetus since Carbon Monoxide is toxic to the mother before it is toxic to the fetus.

#### **11.2 Other information**

The transport of oxygen in blood ensured by haemoglobin will be slowed down because carboxyhaemoglobin instead of oxyhaemoglobin will be formed in lungs. The affinity of heamoglobin for carbon monoxide is 200 to 300 higher then for oxygen. All related health hazards wil be caused by slow respiration of cells which will damage the central nervous system, collapse the cardiovascular system, cause kidney insufficiency, coma, etc.

#### Key to abbreviations

#### LC = Lethal Concentration

TC = Toxic Concentration

#### Section 12 - Ecological Information

#### 12.1 Toxicity

Material data lacking.

#### 12.2 Persistence and degradability

. Material data lacking.

#### 12.3 Bioaccumulative potential

Material data lacking.

#### 12.4 Mobility in Soil

Material data lacking.

#### 12.5 Results of PBT and vPvB assessment

PBT and vPvB assessment has not been conducted for this material.

#### 12.6 Other adverse effects

No studies have been found.

#### Section 13 - Disposal Considerations

#### 13.1 Waste treatment methods

- Product waste
- . Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.
- **Packaging waste**
- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Cylinders should be transported in a secure position, in a well -ventilated vehicle. The 14.6 Special precautions for user transportation of compressed gas cylinders in automobiles or in closed -body vehicles can present serious safety hazards. If transporting these cylinders in vehicles, ensure these cylinders are not exposed to extremely high temperatures (as may occur in an enclosed vehicle on a hot day). Additionally, the vehicle should be well -ventilated during transportation. Not relevant.

#### **15.2 Chemical Safety Assessment**

• No Chemical Safety Assessment has been carried out.

#### **15.3 Other Information**

• WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

## Section 16 - Other Information

#### Relevant Phrases (code & full text)

- H220 Extremely flammable gas
- H270 May cause or intensify fire; oxidizer
- H331 Toxic if inhaled
- H372 Causes damage to organs through prolonged or repeated exposure.
